# 1、 Different "Cookeryaki" (product advantage analysis)

Five generations of technical changes, more than 3,000 machines, and the seven years of technical accumulation, "as long as the hardware is not bad, the machine failure is zero", The reliability of the machine is the industry leader.

Super stable and reliable

The newest Cookeryaki shoppingmall-4 pro model integrates a "smart cleaning" system. All the juicing parts are automatically cleaned to under program control. This reduces the frequency of replacing the juicer parts, greatly reducing the daily maintenance workload, improving operation efficiency.

Smart cleaning system

The garbage system is completely closed. Open the door of the cabinet and do not see any garbage. It is clean and tidy and meets the relevant regulations of the US NSF on food and beverage vending machines.

Fully closed garbage system

The average time of the 3 cups of juice produced by the Cookeryaki shoppingmall-4 pro model is only 100s, which meets the requirements for rapid production.

Rapid production

There are two models: "Capping type" and "Heat-sealing type". It can be equipped with receiving and changing systems for banknotes and coins, and supporting credit card systems in most European, North American, and some of Asian, Australian and African countries.
